

On the occasion of the 6th European Congress of Mathematics (Kraków, 2-7 July 2012) a special medal will be issued. The medal is designed by an outstanding Kraków artist Professor Stefan Dousa. The medal of the diameter 6 cm will be made of bronze. The design of the medal is enclosed below.

Medals will be issued in a special limited series for the Congress invited speakers. However, we plan to issue also another series, intended for purchase by individuals. The price of such a medal will not be higher than 25 PLN (approximately 6 Euro). Those who want to buy such medals are asked for ordering them by e-mail to the address: [medal@6ecm.pl](mailto:medal@6ecm.pl) **not later than 11 June 2012** (but of course: quicker = better). The number of issued medals will depend on the number of people who will order them, so ordering by e-mail will be probably the only way leading to purchasing the medal. On the other hand, we understand that somebody who asks for a medal will buy it later. If an e-mail is not answered within 3 days, please, write again. Those who will order medals will be able to buy them in Kraków during the Congress.
